

# Products

Since 1943,  
M&B Hangers has had an  
unbending commitment to doing  
things the right way. It can be summed  
up in one word. Integrity. It's integrity in  
the products we make and integrity in  
the ways we make those products.

We bend steel. That's what we do every day. We are the largest hanger company in the United States. But for a company that makes a living out of bending steel, we have an unbending attitude when it comes to how we do it. Good is not good enough.

At M&B, we produce a full range of hangers for the dry cleaner and textile rental operator. Making hangers is not just our job, it's our passion. We are a fourth generation American company with an unbending passion to be the best we can be. That means four generations of pride and commitment are going into each and every hanger. For four generations and for generations to come, we have and will continue to make the best hanger in America. Our integrity is something you will always be able to hang onto.

# ULTIMATE

The Ultimate Hanger line is our premier dry cleaning hanger. It is the industry standard for handling professionally finished garments.

After years of working with both big-city dry cleaners and small-town cleaner and laundry shops, we have developed a special line

specifically to meet your needs. Our distributor network will deliver the hanger you need when you need it.

**“The ultimate hanger in the industry for handling professionally finished garments.”**

# SHIRT

The shirt hanger—the staple hanger for any dry cleaner and launderer. It is the best in the industry, and yet we offer every shape in the size needed for your business. These hangers are painted with our proprietary electro-deposition painting process which allows for us to provide the same integrity to our hangers whether they are painted in our standard gold tone, white, black or pink.

# CAPED

Our caped hangers are machine-assembled with our own specialized equipment. We design and build our own machines to produce the finest caped hanger available. We can produce your custom printed hanger. Capes may be printed on one or two sides and are available in 12 1/2, 13, or 14 1/2 gauges and in 16 and 18 inches. We can put your logo on your hanger or design a logo for you. All we require is your name and any ideas you may have.

## M&B PINK HANGERS

Each side of each Pink Caped Hanger displays words to inspire. They communicate messages of Courage, Hope, Persevere and Triumph. With the purchase of these special Pink Caped Hangers, M&B Hangers will be making a donation to the American Cancer Society.

A close-up photograph of a person's hand holding a white, triangular garment hanger. The hanger is suspended by a metal wire. The background is a bright, out-of-focus window with green foliage visible outside. The hanger has a printed message in black text.

Virtually all the wire we use  
in our hangers is made from recycled  
steel and comes from mills using the most  
up-to-date environmental processes. Our hangers  
are then sealed with a time-tested PPG electro-deposition,  
water-based paint system customized specifically for M&B  
that does not include any heavy metals. Additionally, our boxes  
are made from recycled materials, and we use the maximum  
amount of recycled paper possible in all our tubes and capes.

All because we care about America's environment.

# STRUT

We know a strut hanger is worthless if it can't hold the weight of whatever is hanging on it. Because of this, we make the industry's strongest tubes. M&B struts are produced and assembled with our own specialized equipment. Our tubes are latex-coated so the trousers do not slip from side to side or fall off the hanger. Each wire is individually painted with an environmentally safe, water-based paint. The standard tone is gold; white is available for a small additional charge.

# INDUSTRIAL

The textile rental business requires a variety of hangers, all of which must run on your systems effortlessly. We know you expect consistency, and that is why we custom produce our equipment and guarantee a true gauge wire. At M&B we have developed a proprietary process for painting our hangers built on a PPG-tested, Electro-Deposition painting process that gives the hanger a professional look, protects against rust and corrosion, and ensures a smooth surface for dry cleaning and industrial laundry equipment. With multiple North American factories, we can ensure no downtime so you never run out of hangers.

# MISCELLANEOUS

At M&B, we take pride in being your trusted partner. That means offering you more than hangers. Without shoulder and trouser guards, drapery tubes, and a variety of stands, a crease-free presentation of clothing

and linens wouldn't be possible. with the same level of precision and integrity as all M&B hangers. We can offer these hangers because we design and build our own machines.
